SUMMARY

An aspiring developer with a strong foundation in Python programming, web application development, and problem solving. Eager to contribute to innovative projects by delivering efficient and high-quality solutions. Committed to continuous learning and professional growth in the field of development.

EDUCATION

BE Computer Science And Engineering

Kathir College Of Engineering

Nov. 2021 – May 2025

Coimbatore, TN

SKILLS

Languages: Python, Java, SQL, JavaScript, HTML, CSS

Frameworks: React, Node.js, Express, Flask, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

Developer Tools: VS Code, Postman API, Git, PyCharm

Libraries: pandas, NumPy, SQLAlchemy, Axios, parcel, nodemon

CS Concepts: DSA, DBMS, OS, OOPS, RestAPI, AI, Agile, Authentication

EXPERIENCE

Software Developer Intern

Cruzze Solutions LLP

Sep 2024 – Oct 2024

Coimbatore, TN

- Contributed to the development of a comprehensive HR Management System by designing and implementing backend services using Python, Flask and SQLAlchemy.
- Built and maintained RESTful APIs to perform CRUD operations and manage data in Microsoft SQL Server.
- Worked on a complex Interview Scheduling module, integrating multiple entities such as candidates, panel members, interview templates, and interview levels.
- Worked on exception logging module to track API performance and error logs effectively.
- Tech Stack:** Python, Flask, SQLAlchemy, RestAPI, Modular backend structure (Controllers, Services, DTOs), SSMS, Git, Postman.

PROJECTS

NeoHire: Smart Resume Ranking System | Python, Flask, MongoDB, spaCy, SBERT, Torch, CUDA

- An **NLP-driven AI system** to automate resume screening and ranking for IT recruitment.
- Used **spaCy Transformer** for parsing and **SBERT** with dataset-based metrics to compute ranking scores.
- Developed **RESTful APIs** for CRUD and bulk upload operations integrated with MongoDB.
- Created **web interfaces** for resume upload, admin search, filter, and ranking management.

Imagine: Text to Image Generation | MERN Stack, Tailwind CSS, JWT, Razorpay, Clipdrop API

- An AI-based **text-to-image generation platform** enabling users to create images from text prompts.
- Work as **microservices** — **ImagineClient** (React, Tailwind) and **ImagineServer** (Node.js, Express, MongoDB).
- Integrated **Clipdrop API** for image generation and **Razorpay** for secure credit-based payment system.
- Implemented **JWT authentication** and a responsive UI for home, login, and image generation pages.

Gemini-Clone | React, Javascript, Tailwind CSS, Gemini API (gemini-2.5-flash)

- A responsive **Gemini-style AI chat interface** using React and Tailwind CSS.
- Integrated **Gemini 2.5 Flash API** for real-time conversational responses and text generation.
- Implemented a **functional sidebar** for chat management and smooth user navigation.
- Focused on clean UI, seamless prompt handling, and efficient state management.
